

PHOENIX, ARIZONA – (Disclosure & News Service – August 5, 2021) – PetroSun, Inc (OTC PINK: PSUD) The Company announced today that the maintenance and repair operations to the company-owned Crown Duke drilling rig are nearing completion and that the drilling of the Manuel Seep 2-1 should re-commence within the next ten days. Surface casing had been set to 769 feet prior to the maintenance and repair operations.

The MS 2-1 is a helium exploration well and is slated to test select helium bearing zones identified by PetroSun in previous wells drilled by the Company within its 233,460-acre Holbrook Basin leasehold.

Forward-Looking Statements Disclaimer:

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Act of 1934, as amended. In some cases, you can identify forward-looking statements by the following words: “anticipate”, “believe”, “continue”, “could”, “estimate”, “expect”, “intend”, “may”, “ongoing”, “plan”, “potential”, “predict”, “project”, “should”, “will”, “would”, or the negative of these terms or other comparable terminology, although not all forward-looking statements contain these words. Forward-looking statements are not a guarantee of future performance or results and will not necessarily be accurate indications of the times at, or by, which such performance or results will be achieved. Forward-looking statements are based on information available at the time the statements are made and involve known and unknown risks, uncertainty and other factors that may cause our results, levels of activity, performance or achievements to be materially different from the information expressed or implied by the forward-looking statements in this press release. This press release should be considered in light of all filings of the Company that are disclosed on the OTC Market.com website.
