

PHOENIX, ARIZONA – (Disclosure & News Service – July 15, 2021) – PetroSun, Inc (OTC PINK: PSUD) The Company announced today that the surface casing on the Arizona Energy Partners MS 2-1 helium exploration well has been set at a depth of 769 feet. The MS 2-1 (AZOGCC Permit 1216) well is located on the Manuel Seep anticlinal structure in the Holbrook Basin of Apache County, Arizona.

The MS 2-1 will continue drilling to a depth sufficient to test select helium bearing zones identified by PetroSun in previous wells drilled by the Company within the Holbrook Basin. The Company anticipates an additional ten days of drilling to reach total depth. At that point, completion operations will commence and gas samples will be processed by Wyoming Analytical Laboratory.

The current PetroSun leasehold in the Holbrook Basin now exceeds 233,460 acres. The Company has slated up to six additional helium development and exploration wells to be drilled within its Holbrook Basin leasehold during 2021.

Forward-Looking Statements Disclaimer:

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Act of 1934, as amended.
