

PHOENIX, ARIZONA – (Disclosure & News Service – June 14, 2021) – PetroSun, Inc (OTC PINK: PSUD) The Company announced today that the San Judas and San Judas 2 concessions in Satevo, Chihuahua, Mexico that are held by Compania Minera La Meseta have been filed under Title Numbers 244894 and 245386 respectively.

The core drilling and assays to date have documented 136,444,240 tons of zeolite clay with concentrations of lithium averaging 1,763ppm. The rare earth elements identified within the concessions are currently being assayed.

Teche Mining, a subsidiary of PetroSun, holds a 77.5% equity position in Compania Minera La Meseta. Phase 1 of the commercialization of the concession resources has begun with the marketing of the zeolite clays. The initial zeolite clay marketing effort is focused on the agricultural sector. Zeolite is utilized as a slow-release carrier of fertilizer, soil buffering and aerating agent; improving the uptake of nutrients thereby resulting in higher yields.

The processing of the lithium and rare earth elements is slated to commence operations during the first half of 2022. Teche Mining will provide the processing technology for the project.

Forward-Looking Statements Disclaimer:

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Act of 1934, as amended.
