## **Corporate Summary**

PetroSun is in the business of exploration and production of helium, lithium, natural gas, oil, potash, zeolite clays, mine tailings, rare earth gases and metals, and water processing using cutting-edge technologies developed over many decades of research and development. Management is focused on creating long-term value for stockholders and fostering a culture that is steadfast on environmental sustainability, operational safety, social responsibility, and sound corporate governance.

The corporate mission of revenue growth and increasing shareholder value is centered in our portfolio of patented and proprietary Separation Technologies and Processes as the result of our research and development focus, which continues to be one of our highest priorities. Our portfolio of intellectual property in gases, solids, and liquids allow for the potential of production, services, and licensing, increasing the breadth of our market penetration and revenue stability.
